

## **Park Accessibility Guide**

# PARK ACCESSIBILITY GUIDE

## **Welcome to Adventure Island® in Tampa, Florida!**

We're glad you're here! This guide provides an overview of services and facilities available for guests with disabilities who are visiting *Adventure Island* in Tampa, Florida. We are committed to providing a safe and enjoyable environment to all guests. Please refer to Guest Relations at the front of the park if you have any questions.

Our Ride Accessibility Program (RAP) is designed to allow guests to fully participate and enjoy our parks while keeping in mind the safety requirements of our rides and attractions. The program was developed based on the requirements of ride manufacturers and by evaluating the physical and mental attributes required to safely ride each ride and participate in our other attractions. It is our policy to allow any guest to ride our rides and enjoy our attractions so long as they meet all of these requirements and such that riding does not present a potential hazard to himself or herself or others.

**NOTICE:** The information in this guide is subject to change without notice. Please feel free to visit Guest Relations for current information on accessibility and services. You may also speak with an ambassador regarding accessibility prior to boarding a particular attraction.

## General Park Information

### SERVICE ANIMALS

Service animals are welcome at SeaWorld Parks & Entertainment® facilities. Service animals are limited to dogs and miniature horses that have been individually trained to do work or perform tasks for the benefit of an individual with a disability.

Service animals must remain on a leash or harness and/or under the control of its handler at all times and be house broken. If at any time your service animal's behavior is out of control, you will be asked to remove your service animal from the premises.

Service animals are not permitted in pools, rivers, or other water attractions. In addition, all service animals must remain at least 10 feet from the water's edge.

*Adventure Island* team members are not permitted to care for assistance animals.

#### **“Break” Area for Service Animals**

For your convenience a Service Animal “Relief Area” is located behind Key West Rapids.

### PARKING

Parking is provided directly in front of the main entrance for guests with a legal parking permit. Most spaces for guests with disabilities are accessible to vans.

### WHEELCHAIR RENTAL

Wheelchairs and ECV's are rented on a “first-come, first served” basis to guests with disabilities. Guests may also use their own wheelchairs or ECV's inside the park.

### SEGWAY®

*SeaWorld Parks & Entertainment* is committed to providing guests a safe and enjoyable experience. Because of different pathway configurations and terrain, as well as large crowds that include small children and strollers, we regret that we cannot permit the use of two-wheeled, self-balancing electric vehicles such as Segways. We are pleased to offer other forms of personal transportation and standard wheelchairs and we encourage you to contact Guest Services with any questions you may have.

### RESTROOMS

All restrooms are accessible to guests using wheelchairs and are clearly marked with the disabled symbol throughout the park. Companion restroom facilities are located near Duvall Street, First Aid and Corkscrew Restroom. An ADA shower is also located at the Duvall Street Restrooms.

## **FIRST AID**

*Adventure Island's* First Aid station is located near the front entrance to the park. This office is staffed by Registered Nurses and Emergency Medical Technicians. Ambassadors throughout the park are available to call for assistance upon request.

## **RESTAURANTS**

While dining at our restaurants, please be aware that most venues offer cafeteria-style service. For guests with special dietary needs, we offer a variety of allergy friendly options throughout our park. You may stop by Guest Services, or any of our meal facilities, to receive an Allergen Card with more detail on our Allergy-Friendly program and culinary options for those guests with allergies. We also suggest you visit meal facilities during non-peak hours or ahead of meal time so that you can be efficiently assisted and served.

For any of our guests that cannot wait in long lines, are unable to access the cafeteria lines or have special dietary needs, please go straight to the cashier (or restaurant hostess) upon arrival and ask to speak with a supervisor for assistance.

## **GIFT SHOPS**

The gift shop is wheelchair accessible. Please ask any team member for assistance.

## **RIDE ACCESS INFORMATION**

At *Adventure Island*, safety is the only consideration that takes precedence over fun! Thrill rides, by their very nature, create forces and speeds that may not be acceptable or tolerable to some guests and may cause injury to riders with pre-existing conditions.

Many theme park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These systems may place restrictions on the ability of an individual to safely experience the ride. In general, you should ride only if you are in good health. Do not ride if you know or suspect you may be pregnant, have high blood pressure, heart, neck or back problems, motion sickness, recent surgery, or any other medical condition that may be affected by the features of the ride. You should not ride if you have any impairment or condition that would prevent the intended use of seating and safety restraints as provided or inability to follow any safety requirement.

In order to ride, guests must be able to maintain the proper riding position throughout the ride and brace themselves upright in their seat, keeping their head upright and their back against the seatback. Guests must be able to use the restraint device properly and be able to hold on tight and keep their hands, arms, legs, and feet down and inside the ride at all times. Guests must be able to demonstrate a willingness and ability to comply with verbal and written rider requirements. The rider requirements and health restrictions are listed at the entrance of each ride.

Guests with casts or braces will be restricted from riding certain rides where the cast or brace may present a hazard to the guest or others. Please consult with our Guest Relations team for more information or if in doubt about your ability to safely experience a ride.

*Adventure Island* ambassadors can offer assistance steadying a guest transferring to or from a wheelchair. They may not lift or assist in lifting anyone using a wheelchair. All guests must be able to board a ride themselves or with help from a member of their party. The maturity level of any rider must be considered prior to riding.

## **HEIGHT REQUIREMENTS**

Height requirements are posted at each attraction. Your child may be measured at the height check station located at the entrance of each attraction. All guests, including those using wheelchairs, must meet the height requirement.

## **CASTS, BRACES AND WALKING BOOTS**

Guests with a full arm cast, full leg cast, or braced arm cast may be restricted from riding certain rides and should refer to the Ride Information section of this guide for more information-

## **PROSTHETIC DEVICES AND AMPUTATIONS**

Some rides do not allow riders to wear prosthetic devices or to ride with certain amputations. Guests with any type of prosthesis should ensure it is properly secured before riding those attractions where permitted. Guests should refer to Guest Relations or the 'Ride Information' section of this guide to determine their specific ability to ride.

## **GUESTS OF EXCEPTIONAL SIZE**

In order to ride, guests must be able to fit properly in the tube or raft designed for the attraction and may not exceed the weight limit for that particular ride. Guests should refer to Guest Relations or the 'Ride Information' section of this guide to determine their specific ability to ride.

## **LOOSE ARTICLE POLICY**

Loose articles need to be secured during the ride cycle. Items are recommended to be left in a locker or with a non-rider. *Adventure Island* is not responsible for lost or damaged articles.

## **CAMERA POLICY**

Due to the nature and dynamics of all rides and the potential for injury, unsecured cameras or video cameras of any size are not permitted on the rides. To store such equipment, leave with a non-rider or use the lockers that are available.

## **OXYGEN TANKS**

Due to the dynamics and certain characteristics of the rides, oxygen tanks are not permitted on any ride at *Adventure Island*. Oxygen tanks are permitted inside the park and may be brought into merchandise shops and restaurants.

## **BEFORE EXPERIENCING A RIDE PLEASE NOTE ALL SAFETY WARNINGS BOTH VERBAL AND WRITTEN FOR EACH RIDE, SUCH AS:**

- Only guests in good health should ride this attraction. Do not ride if you are pregnant, have high blood pressure, motion sickness, heart, neck or back problems, fear of heights, sensitivity to strobe effects, recent surgery or any other medical condition that might be aggravated by the forces of this ride.
- Riders of this attraction will be exposed to forces, speeds, and other intense features that may cause distress or injury to persons with pre-existing health conditions. Please consider these features in determining suitability for all riders.

- Riders shall report all injuries before leaving the park today. Lifeguards may not make direct eye contact while speaking to you.
- Follow all instructions, and WAIT FOR THE ATTENDANT'S SIGNAL BEFORE SLIDING.
- All life vests must be worn properly, this includes proper size fitting and all buckles buckled. Life vests MAY NOT be worn around the legs or used for sitting.
- Swimming attire with buckles, rivets or any sharp objects may not be worn. You are responsible for your personal property.
- No smoking while in line or while riding. Smoking is not permitted within any enclosed buildings, queue lines or pools.

## DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Adventure Island uses the following terms:

*Supervising Companion:* A supervising companion is someone who physically and mentally meets all the requirements to ride the ride themselves, is 14 years of age or older, and exhibits the maturity of someone 14 years of age or older.

*Accompanied By:* Whenever a guest needs accompaniment, the accompanying person must meet all the ride requirements, as well as assist the guest. This includes helping the guests in the boarding and exiting of the ride, assisting the guest in maintaining postural control while riding, and assisting the guest up/down stairs, catwalks, or ladders.

*Hand-held Infant:* A hand-held infant is a child who is unable to walk to the ride unit independently or maintain independent seated postural control. Hand-held infants are not permitted on slides, structures or play elements. Hand-held infants are only permitted on the following attractions when accompanied by a supervising companion and only permitted in water up to mid-chest height while sitting.

- Endless Surf
- Fabians Funport
- Rambling Bayou
- Splash Attack

*Functioning Extremity:* A functioning extremity is a limb over which a person has control. A prosthetic device is considered a functioning extremity.

*Ability to hold on or brace:* Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

## **RIDERSHIP CRITERIA**

The ability for a disabled guest to ride certain rides or attractions is evaluated based on certain criteria which may include manufacture's requirements and other safety considerations. Some of those may include the following:.

**1. Ability to maintain the proper riding position throughout the ride.**

The guest must have the body and spinal control to maintain the proper riding position throughout the ride without the aid of other people or devices and be able to maintain the proper riding position even during bumping or other characteristic movements of the ride.

**2. Weight distribution to allow the restraint device to function as designed.**

The weight distribution of the guest's body must not interfere with any of the ride or attraction's safety and restraint devices as they were designed.

**3. Control of upper torso – including head and neck.**

The guest must have sufficient muscle control to support their head, neck and upper torso in the proper position during the ride or attractions designed dynamic motions.

**4. Ability to hold on with one functioning hand.**

A functioning hand is an upper extremity or prosthesis with fingers that have the ability to grasp the restraint device and exhibits good grip control; the ability to brace and is strong enough to maintain the proper riding position throughout the duration of the ride.

**5. Ability to hold on with two functioning hands.**

Ability to hold on with two functioning hands as described above.

**6. Ability to hold on with one functioning arm.**

A functioning arm is an upper extremity or prosthesis that has the ability to arm-grip the restraint device by wrapping the arm around the restraint device and is strong enough to allow the guest to maintain the proper riding position throughout the duration of the ride.

**7. Ability to hold on with two functioning arms.**

Ability to hold on with two functioning arms as described above.

**8. Ability to brace self with one functioning leg.**

Guest must have one functioning leg, natural or prosthetic, for bracing their body during the course of the ride or attraction.

**9. Ability to brace self with two functioning legs.**

Guest must have two functioning legs, natural or prosthetic, to be used for bracing their body during the course of the ride or attraction and maintaining balance when entering and exiting a ride or attraction.

**10. Minimum of two functioning extremities.**

Guest must have a minimum of two functioning extremities, natural or prosthetic (two arms, two legs, or one arm and one leg), to brace themselves during the ride and assist in entering and exiting the ride or attraction.

**11. Minimum of three functioning extremities.**

Guest must have a minimum of three functioning extremities, natural or prosthetic (two legs and an arm or two arms and a leg) to allow the guest to brace in a tripod manner during the ride.

**12. Ability to enter and exit the ride without endangering self or others.**

Guest must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include entering through an exit or having someone aid him or her in boarding. If a guest has to be lifted in and out of a ride unit, they must be accompanied by a supervising companion who is

accustomed to doing this. For the safety of ride or attraction operators and the guest, our operators are instructed not to perform this function, other than in children's ride areas.

### **13. Appropriate Observed Conduct.**

Guest must demonstrate appropriate observed conduct by indicating a willingness and ability to understand, participate in, and follow all rider requirements. Appropriate observed conduct may include but not be limited to, maintaining the proper riding position, attention to and compliance with safety instructions, proper use of restraints and safety equipment and a willingness to participate in the attraction.

In addition to the basic physical and mental requirements defined above, each ride is evaluated relative to specific temporary conditions which may prevent a guest from safely riding a particular ride.

Some of the specific conditions evaluated include:

- Cervical collar or neck brace
- Broken collar bone
- Full arm cast
- Braced arm cast
- Lower arm cast
- Full leg cast
- Lower leg cast
- Bilateral abduction leg casts (brace between legs)
- The suitability of safely carrying hand-held infants on each ride was also evaluated.

## RIDE INFORMATION

The following descriptions are designed to give you information on the type of actions caused by various rides along with their unique physical restrictions. If you enrolled in the Ride Accessibility Program, follow the directions under each ride below.

### RIPTIDE

*Single-rider bodysurfing mat speed-slide*

Ride Access: Guests must be able to climb stairs to the top of the ride tower.

Height Restrictions: Guest must be at least 42”

Weight Restrictions: 300 lbs

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with two functioning hands.
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Hand-held infants are not permitted on this attraction.

### ARUBA TUBA

*Double/Single-rider tube*

Ride Access: Guests must be able to climb stairs to the top of the ride tower.

Height Restrictions: 42” or accompanied by a supervising companion. Guests 42” and under are required to wear a life vest.

Weight Restrictions: 300 lbs single tube and 600 lbs double tube

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with two functioning hands.
- The ability to brace with one functioning leg.
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements. (Supervising companion may assist.)

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Hand-held infants are not permitted on this attraction.

## **CALYPSO COASTER**

*Double/Single-rider tube flume*

Ride Access: Guest must be able to climb stairs to the top of the ride tower.

Height Restrictions: 42” or accompanied by a supervising companion. Guests 42” and under are required to wear a life vest.

Weight Restrictions: 300 lbs for single tube and 600 lbs for double tube

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with one functioning hand.
- The ability to brace with one functioning leg.
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements. (Supervising companion may assist.)

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Hand-held infants are not permitted on this attraction.

## **WAHOO RUN**

*Family raft ride*

Ride Access: Guest must be able to climb stairs to the top of the ride tower. Up to 4 adults and 1 child

Weight Restrictions: 800 lbs

Height Restrictions: 42” or accompanied by a supervising companion. Guests 42” and under are required to wear a life vest.

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with one functioning hand.
- The ability to enter/exit the ride without endangering self or others. (Supervising companion may assist.)
- Awareness of and a willingness to follow all rider requirements. (Supervising companion may assist.)

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Hand-held infants are not permitted on this attraction.

## **COLOSSAL CURL**

*Family raft ride*

Ride Access: Guest must be able to climb stairs to the top of the ride tower. Up to 4 adults (single riders not permitted)

Weight Restrictions: 700 lbs

Height Restrictions: 48”

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with two functioning hands.
- The ability to enter/exit the ride without endangering self or others. (Supervising companion may assist.)
- Awareness of and a willingness to follow all rider requirements. (Supervising companion may assist.)

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Hand-held infants are not permitted on this attraction.

## **RUNAWAY RAPIDS 1-2 (CORKSCREW CANAL AND LITTLE SQUIRT)**

*Parent-child slides*

Ride Access: Accessible to mobility impaired guests. Maximum water depth of 3’

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with one functioning arm.
- Ability to hold on with two functioning arms. (see comments below)
- The ability to brace with one functioning leg.
- The ability to enter/exit the ride without endangering self or others. Awareness of and a willingness to follow all rider requirements.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Guests with forearm casts are permitted to ride. However, guests are required to wear a pad over the cast to prevent injury to themselves or others.
- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Ability to hold on with two functioning arms (the supervising companion must have two functioning arms and a functioning leg if they are riding with a child)
- Hand-held infants are not permitted on this attraction.

## **RUNAWAY RAPIDS 3, 4, 5 (COURAGEOUS FALLS, RIVER OF NO RETURN AND BARRATUBA RUN)**

### *Body Slides*

Ride Access: Accessible to mobility impaired guests. Maximum water depth of 3'

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with two functioning arms.
- The ability to brace with one functioning leg.
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Guests with forearm casts are permitted to ride. However, guests are required to wear a pad over the cast to prevent injury to themselves or others.
- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Hand-held infants are not permitted on this attraction.

## **SPLASH ATTACK (ENCLOSED SLIDES)**

### *Children's Slides*

Ride Access: Guest must be able to climb stairs to the top of the slides.

Height Restrictions: None

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with one functioning arm.
- The ability to brace with one functioning leg.
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Guests with forearm casts are permitted to ride. However, guests are required to wear a pad over the cast to prevent injury to themselves or others.
- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Hand-held infants are not permitted on this attraction.

## **SPLASH ATTACK (OPEN SLIDES)**

### *Parent-child slides*

Ride Access: Guest must be able to climb stairs to the top of the slides.

Height Restrictions: None

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with one functioning arm
- Ability to hold on with two functioning arms. (see comment)
- The ability to brace with one functioning leg.
- The ability to enter/exit the ride without endangering self or others. Awareness of and a willingness to follow all rider requirements.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Guests with forearm casts are permitted to ride. However, guests are required to wear a pad over the cast to prevent injury to themselves or others.
- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Ability to hold on with two functioning arms. (the supervising companion must have two functioning arms and a functioning leg if they are riding with a child)
- Hand-held infants are not permitted on this attraction.

## **CARRIBBEAN CORKSCREW**

### *Body Slides*

Ride Access: Guest must be able to climb stairs/play structure to the top of the slides.

Height Restrictions: Guest must be at least 48”

Weight Restrictions: 300 lbs

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with one functioning arm.
- The ability to brace with two functioning legs.
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, forearm cast braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Hand-held infants are not permitted on this attraction.

## **KEY WEST RAPIDS**

### *Tube Slide*

Ride Access: Guest must be able to climb stairs to the top of the slides.

Height Restrictions: Minimum Height 42”. Guests 54” and under are required to wear a life vest.

Weight Restrictions: 300 lbs

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with one functioning hand.
- The ability to brace with one functioning leg.
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements (accompanied by a supervising companion who fits the criteria for that category)

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Hand-held infants are not permitted on this attraction.

## PARADISE LAGOON (CLIFF JUMPS)

### *Cliff Jumps*

Ride Access: Accessible to mobility impaired guests. Weak or non swimmers should not experience

Height Restrictions: None.

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with one functioning arm.
- The ability to brace with one functioning leg.
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Hand-held infants are not permitted on this attraction.

## **PARADISE LAGOON (LILY PADS)**

*Hand-Over-Hand Net with lily pads*

Ride Access: Accessible to mobility impaired guests.

Height Restrictions: None

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- Minimum of two functioning extremities.
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Hand-held infants are not permitted on this attraction.

## **WATER MOCCASIN**

*Body Slides*

Ride Access: Guest must be able to climb stairs to the top of the ride tower.

Height Restrictions: Guest must be at least 48”

Weight Restrictions: 300 lbs

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- Ability to hold on with one functioning arm.
- Ability to brace with two functioning legs.
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, forearm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Hand-held infants are not permitted on this attraction.

## **VANISH POINT (SKY BOX)**

*Single-rider vertical drop body slide*

Ride Access: Guest must be able to climb stairs to the top of the ride tower.

Height Restrictions: Guest must be at least 48”

Weight Restrictions: 300 lbs

In order to ride independently, a guest must have:

- The ability to stand upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with one functioning arm.
- The ability to brace with one functioning leg. (see comment below)
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Hand-held infants are not permitted on this attraction.
- Amputation must be at or below the knee.

## **VANISH POINT (SPEED SLIDE)**

*Single-rider vertical drop body slide*

Ride Access: Guest must be able to climb stairs to the top of the ride tower.

Height Restrictions: Guest must be at least 48”

Weight Restrictions: NA

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to hold on with one functioning arm.
- The ability to brace with one functioning leg. (see comment below)
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Any prosthetic device with exposed metal must be covered with a pad while on this ride.
- Hand-held infants are not permitted on this attraction.
- Amputation must be at or below the knee.

## ATTRACTION INFORMATION

The following descriptions are designed to give you information on the type of actions caused by various attractions along with their unique physical restrictions. If you enrolled in the Ride Accessibility Program, follow the directions under each attraction below.

### ENDLESS SURF

*Wave pool*

*Attraction Access:* Accessible to mobility impaired guests via sloped entry as well as transfer system located at the south side of the pool. Maximum depth of 6’

*Height Restrictions:* None. Life vest recommended for weak or non swimmers.

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride.
- Control of their upper torso – including their head and neck.
- The ability to enter/exit the ride without endangering self or others.
- Awareness of and a willingness to follow all rider requirements.
- A supervising companion may assist with all of the requirements above. However, guests in need of assistance with these tasks are only permitted in water up to mid-chest height while sitting.

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, full arm cast, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Guests with forearm casts are permitted to ride. However, we highly recommend that a pad be worn to prevent injury to themselves or others.
- Hand-held infants are also permitted but must be accompanied by a supervising companion.

### RAMBLING BAYOU

*Lazy River*

*Attraction Access:* Accessible to mobility impaired guests via ramp in front of Duval Street Market and steps located along Mango Joe’s walkway.

*Height Restrictions:* None. Guests 42” and under are required to wear a life vest.

In order to ride independently, a guest must have:

- The ability to sit upright and maintain the proper riding position throughout the ride. (Supervising companion may assist.)
- Control of their upper torso – including their head and neck. (Supervising companion may assist.)
- The ability to enter/exit the ride without endangering self or others. (Supervising companion may assist.)
- Awareness of and a willingness to follow all rider requirements. (Supervising companion may assist.)

Conditions that cannot be permitted:

- Cervical collar or neck brace, broken collar bone, braced arm cast, full leg cast, lower leg cast, brace between legs.

Comments:

- Guests with full arm and forearm casts are permitted to ride. However, we highly recommend that a pad be worn to prevent injury to themselves or others.
- Hand-held infants are permitted but must be accompanied by a supervising companion.

## **FABIAN'S FUNPORT**

*Children's play area*

Attraction Access: Sloped entry, accessible to mobility impaired guests.

Height Restrictions: 56" or less or accompanied by a child. Guests 42" and under are required to wear a life vest.

In order to ride independently, a guest must have:
