CONSERVATION EFFORTS

A Commitment to Education

Guests who pass through the gates of one of our parks will benefit from educational experiences intended to inspire a deeper understanding, respect and desire to protect all wildlife.

The parks' educational programs have helped schools, teachers, children and adults explore our world and its inhabitants. We offer our guests countless informal teaching experiences inside the parks including educators, show and exhibit narrations, and interpretive and interactive graphics.

Wildlife Rescue

With a legacy of animal rescue spanning more than 50 years and benefiting more than 40,000 animals and counting, responding to wildlife in crisis is a commitment we take to heart. Working in partnership with federal, state and local agencies, our rescue teams are on call 24/7 assisting animals that are orphaned, ill, injured or in need of expert care. Our goal is to successfully rehabilitate animals for return to the wild. The small percentage of animals whose injuries are too debilitating to permit release are given lifelong care.

Conservation

The SeaWorld® Conservation Fund is just one way our guests can get involved in conservation. The fund supports wildlife research, habitat protection, animal rescue, and conservation education in the U.S. and countries all over the world. The fund provides a direct outlet for park visitors to support wildlife, SeaWorld Parks & Entertainment provides all administrative and development costs, staffing, and infrastructure, committing 100 percent of donations to on-the-ground wildlife conservation efforts. The fund has provided more than \$19 million in grants for financial and scientific support to 1,391 different conservation projects on all seven continents. More than 100 different species have been helped through fund grants.
