

Brown pelicans have a wingspan of more than 6.5 feet. That's taller than most humans!

Fishing in the hot sun is tough work, but a pelican can cool itself off by fluttering its throat pouch up to 200 times a minute.

# PELICANS

## AUGUST 2018

### DID YOU KNOW?

Pelicans have an extendable sac of skin at the base of their throat called a gular, which can hold up to three gallons of water—that's one big water balloon!

SeaWorld is home to some rescued pelicans where they can continue receiving special care. Stop by to see these amazing animals and learn more about their species and conservation!
